SHREYAS NALAWADE

Full Stack Developer | Java | Spring Boot | Laravel | React

Mumbai, Maharashtra, India | shreyashnalawade09@gmail.com | linkedin.com/in/shreyas-s-nalawade-234340283
github.com/ShreyasNalawade | shreyas.ssngo.shop

PROFESSIONAL SUMMARY

Full Stack Developer with production experience building SaaS CRMs, business automation platforms, and high-traffic messaging systems. Skilled in Java, Spring Boot, Laravel/PHP, React, JavaScript, MySQL, and MongoDB. At Insign Technology, delivered end-to-end web systems covering REST APIs, real-time features, database design, and client-facing UIs. Strong in converting business requirements into scalable, maintainable software with focus on performance, security, and clean architecture.

TECHNICAL SKILLS

Languages:	Java, JavaScript, PHP, SQL, HTML5, CSS3
Backend:	Spring Boot, Laravel, REST APIs, JDBC, Hibernate, Node fundamentals
Frontend:	React.js, JavaScript, Tailwind CSS, jQuery, Responsive UI
Databases:	MySQL, MongoDB, Oracle SQL, Redis
Tools / DevOps:	Git, GitHub, GitHub Actions (CI/CD), Linux/VPS, phpMyAdmin, Postman
Other:	WebSockets, WhatsApp Cloud API, SMTP, Selenium (Java), OOP, SDLC

PROFESSIONAL EXPERIENCE

Software Engineer — Insign Technology Pvt Ltd **Mar 2025 – Present**

Mumbai, Maharashtra | Full Stack Development (SaaS, CRM & Business Automation)

- Develop and maintain SaaS CRM and business management applications using Laravel, React.js, Java, and MySQL for advertising and SMB clients.
- Built a Dental Clinic Management System with patient records, appointment booking, billing/invoicing, and digital prescriptions (Laravel, MySQL, Tailwind).
- Engineered an IP-TV Control Engine enabling single-click ad broadcast, 6-digit device pairing, campaign scheduling, and WebSocket-based live device control at scale.
- Delivered a Smart Inventory & Finance Manager for market operations: stock intake, paid/unpaid bill tracking, daily ledger/income, and credit interest calculations.
- Developed a Bulk WhatsApp & Email Campaign Engine with personalized media, chatbot flows, Redis-backed high-speed delivery, and per-contact downloadable reports.
- Designed REST APIs, optimized MySQL schemas/queries, and deployed production systems on Linux/VPS with Git-based CI/CD workflows.
- Collaborated with clients to gather requirements, ship iterative releases, and improve UX for operational dashboards and admin panels.

PROJECTS

Live Chat Application (Real-Time Messaging)

Laravel, WebSockets, Broadcasting Events | github.com/ShreyasNalawade/LiveChatApp-laravel-websocket

- Built a real-time messaging app using Laravel WebSockets and event broadcasting for instant chat updates.

Smart Inventory Management System

Laravel (Blade), PHP, MySQL | github.com/ShreyasNalawade/Sn_Inventory

- Developed inventory workflows for stock tracking, billing status, and operational reporting used in business day-to-day operations.

Dukandari.ai — AI Marketing Platform (Frontend)

HTML5, CSS3, JavaScript, GSAP | dukandari.ai

- Created a conversion-focused SaaS landing page showcasing multi-channel marketing automation (Google, Facebook, Instagram, WhatsApp).

Sharashri — Folk Art & Culture Website

HTML5, CSS3, Tailwind CSS, JavaScript | sharashri.online

- Built a responsive cultural showcase site with Marathi typography, event/gallery sections, and storytelling layout.

EDUCATION

Bachelor of Engineering (B.E.), Mechanical Engineering **2021 – 2024**

Smt. Indira Gandhi College of Engineering (Mumbai University), Navi Mumbai — CGPA: 7.32

Diploma in Mechanical Engineering **2018 – 2021**

Government Polytechnic Mumbai — 76.40%

CERTIFICATIONS & TRAINING

Java Full Stack Development — QSpiders **Completed**

- Core Java (OOP, Collections, Exception Handling), JDBC, Servlets, JSP, Hibernate, SQL (Oracle), HTML, CSS, JavaScript.

ACHIEVEMENTS

- Transitioned from Mechanical Engineering into Full Stack Development through structured Java training and production project delivery.
- Independently owned multiple client-facing systems (CRM, IPTV broadcast, inventory finance, messaging automation) from requirement analysis to deployment.
- Improved large-scale data processing workflows (including bulk MySQL operations) and implemented CI/CD auto-deployment for Laravel apps on VPS.
- Delivered production UIs and backend modules used by real businesses in healthcare, advertising/broadcasting, and retail operations.
